GUIDE FOR THE PREPARATION OF MANUSCRIPTS TO PROSPECTIVE AUTHORS FOR THE SCIENTIFIC BULLETIN

A- OBJECTIVES

The Bulletin aims at the development of knowledge in the field of engineering, technology and related sciences. All innovative, valuable and useful articles as research or review papers or reports will be regarded. In order to guarantee the highest possible standard, the received articles are rigorously refereed. However, articles that have been published before or which were submitted for publication in another magazine will not be considered.

B- GUIDELINES

1. **Language** : English or Arabic

2. **Typescript** : The complete paper should be camera-ready, laser-typed, single-sided with double-line spacing, five-space paragraph indentation, on standard A4 size paper. The Times New Roman is the preferred font for use. 25 mm margin is to be left on the four sides of the page.

3. **Number of copies** : For the purposes of refereeing and editing, the original and three copies of the paper are required. The referees will receive unidentified copies.

4. **Length** : The fee will account for a maximum of 15 pages. Additional pages are charged as per page. All pages must be numbered.

C- CONTENTS

The first page of the article should include :

- A title consisting of a maximum of 10 words in bold capital letters (18 pt font) and centered.
- The authors names (14 pt font) followed by their affiliations and present addresses should be centered under the title.
- Indexing terms (12 pt font) containing a maximum of six key words indicating the area of the paper.

- An abstract of not more than 100 words (14 pt font) in the same language of the text to give the summary of the main contents of the paper. This should give a clear and concise view of the state-of-the-art and motivation of the subject, an outline of the paper and its contribution. The abstract should not include any references.
- A translation in the other language.

The following pages should include :

- A list of the used symbols, acronyms, etc.
- An introduction explaing the nature of the study, previous work, purpose and contribution of the paper.
- The text of the article suitably itemized.
- Conclusions indicating advantages, limitations and possible applications.
- Mathematical equations typewritten leaving double-spaces on either side and using the SI units.
- Drawing computer- designed made using India ink on transparent or white paper. Lettering must be typewritten or written by template.
- Tables should be typewritten in serial with clear headlines and should not be a repetition of any information that has appeared somewhere else in the article.

Table of Contents

PART I

Architecture and Civil Engineering

Page

1- Analysis Of Reinforced Concrete Shear Walls With Openings
Mostafa K. M. Zidan, Mohamed M. H. Attabi and Ashraf A. M. Abu Kracha 1
2- Optimum Location and Proportioning of Bracing Systems in Multi-Storey Frameworks for Maximum Buckling Strength
Moahmed Saad Raslan 26
3- Introducing and Potential of Geographic Information Systems (GIS) in Transportation Planning in Egypt
Ahmed Hamdy Ghareib 44
4- Discovering The Blunders in The Egyptian Gravity Networks Using Least Squares Collocation
Mohamed E. A. El-Tokhey and Hussein A. Abd-Elmotaal 62
5- Friction Losses in Uniform Multiple Outlet Pipes
Farouk A. El-Fitiany 72
6- Effect of Heading-Up and Permanent Storage on Canal Discharge
Farouk A. El-Fitiany 89
7- Local Scour Downstream of Circular Culverts
Shazy Abdelfatah Ibrahim, Essam Aly Abdel-Hafiz and Ali Mohamed Talaat 105
8- Sediment Transport in The Surf Zone
Farouk M. Abdel-Aal 120
9- Stability of Alluvial Channels
Farouk M. Abdel-Aal 133
10- Impact of Wastewater Discharges on Phytoplanktonic Structure of The Nile River
Sohair I. Abou-Elela, Salwa A. Shehata and Aly N. El-Bahrawy 148

PART II

Electrical and Mechanical Engineering, Physics and Mathematics

11- Critical heat For Forced And Natural Flow of Water in Vertical Annuli at Uniform And Nonuniform Axial Flux Distribution
G. M. Zaki and A. M. Al-Turki 168
12- A Distributed Real-Time Transaction Processing Environment For The CIM Applications
Y. Dakroury and J. P. Elloy 191
13- Cost Effective Parallel Processors Assignment Approach (CDPA)
Aida O. Abd El-Gwad, Salwa M. Nassar and Rasha E. Tawhid 204
14- Expert System For Business Administration
Myahya A. Ibrahim, Hany Harb and Mohamed Z. Abd-Elmegid 219
15- Adaptive Intelligent Agent A Design Approach For a Decision Support System
Mohamed A. Salem, Nabil A. El-Nady and Osman A. Badr 234
16- Analytical And Experimental Study For A Control System of Sapv System
A. maamoun, M. S. Abdel-Motaleb and H. El-Khashab 258
17- New Technique For The Stability Analysis of Digital Controlled Electric Power Systems
A. H. Amer 271
18- Optimal Control of Double Output Induction Generator Using Optimal Regulator Theory
M. N. Eskander, M. S. Abd El-Motaleb and H. A. El-Khashab 284
19- Consolidation of Rapidly Solidified Tial-Powder By Ceracon Process
M. A. Zamzam 295
