SCIENTIFIC BULLETIN

EDITORIAL BOARD

- 1- Prof. Mohamed Abdel-Hamid Sheirah (Chief Editor)
2- Prof. Ali Mohamed Talaat (Co_Editor)
3- Prof. Mohamed El-Niazi Hamad
4- Prof. Salah El-Din Mohamed El-Mohdy
5- Prof. Saad Kamel Massoud
6- Prof. Ali Kamel El-Kharashi
7- Prof. Abdel-Hady Hasny Hassan
8- Prof. Mohamed Zaki Hawas

Prices Per Volume excluding mail postage:

Individuals:	Egypt		Overseas
	Authors	20 LE	20 US \$
Non-Authors	35 LE	35 US \$	
Societies:	90 LE	90 US \$	

**GUIDE FOR THE PREPARATION OF MANUSCRIPTS
TO PROSPECTIVE AUTHORS FOR THE SCIENTIFIC BULLETIN**

A- OBJECTIVES

The Bulletin aims at the development of knowledge in the field of engineering, technology and related sciences. All innovative, valuable and useful articles as research or review papers or reports will be regarded. In order to guarantee the highest possible standard, the received articles are rigorously refereed. However, articles that have been published before or which were submitted for publication in another magazine will not be considered.

B- GUIDELINES

1. **Language** : English or Arabic
2. **Typescript** : The complete paper should be camera-ready, laser-typed, single-sided with double-line spacing, five-space paragraph indentation, on standard A4 size paper. The Times New Roman is the preferred font for use. 25 mm margin is to be left on the four sides of the page.
3. **Number of copies** : For the purposes of refereeing and editing, the original and three copies of the paper are required. The referees will receive unidentified copies.
4. **Length** : The fee will account for a maximum of 15 pages. Additional pages are charged as per page. All pages must be numbered.

C- CONTENTS

SINCE 1954

The first page of the article should include :

- A title consisting of a maximum of 10 words in bold capital letters (18 pt font) and centered.
- The authors names (14 pt font) followed by their affiliations and present addresses should be centered under the title.
- Indexing terms (12 pt font) containing a maximum of six key words indicating the area of the paper.

- An abstract of not more than 100 words (14 pt font) in the same language of the text to give the summary of the main contents of the paper. This should give a clear and concise view of the state-of-the-art and motivation of the subject, an outline of the paper and its contribution. The abstract should not include any references.
 - A translation in the other language.
- The following pages should include :
- A list of the used symbols, acronyms, etc.
 - An introduction explaining the nature of the study, previous work, purpose and contribution of the paper.
 - The text of the article suitably itemized.
 - Conclusions indicating advantages, limitations and possible applications.
 - Mathematical equations typewritten leaving double-spaces on either side and using the SI units.
 - Drawing computer-designed made using India ink on transparent or white paper. Lettering must be typewritten or written by template.
 - Tables should be typewritten in serial with clear headlines and should not be a repetition of any information that has appeared somewhere else in the article.

Table of Contents**PART I****Architecture and Civil Engineering**

	Page
1. Applicability of Quality Assurance Systems In Egyptian Road Construction Industry Osama Hussein M. Okail.....	1
2. Wave Energy Dissipation By Using Submerged Rubble Mound Breakwaters Abd El-Fattah El-Fiky, Abd El-Mohsen El-Mony, Aly N. El-Bahravy & Mootaz A. Khaled.....	23
3. Use of Spreadsheets For The Design of Collection Networks Aly N. El-Bahravy.....	33
4. A Study of Pivotal Shock Absorber And Method of Calculation Raghib O. S. S.....	51
5. Revetments For Shore Protection Farouk M. Abdel-Aal	65
6. River Sediment Transport Farouk M. Abdel-Aal	77
7. Influence of Macroturbulent Energy Over The Scour Process Emad Hosny Habib, Nahla Abouel Atta, Mohamed Abdel Moteleb, Ali Mohamed Talata & Mohamed El-Niazy Hammed.....	89

PART II**Electrical and Mechanical Engineering, Physics and Mathematics**

8 One Program For Classification of The Degree of Polynomials and Their Periods S. M. Ahmed.....	102
9 An Efficient Codebook For Arabic speech Using Optimized Vector Quantization M. Fahmy Abu El-Yazeed and A. H. Khalil.....	118
10 Performance Tuning of A Multiprocessor Pool System Salma Abdel-Kader Ghoneim.....	131
11 دهاب أحد جمل الدين / دجلة الفرات على مرحلة مسيرة الحفريات السريان دهاب أحد جمل الدين / دجلة الفرات	164
12 Dynamic Timeouts and Decisions in Client Server-Based Distributed Systems Salma Abdel-Kader Ghoneim.....	191
13 Determination of An Approximate Critical Loading Condition And Static Voltage Stability Margin of A Power System Using Bus Impedance Method Aboul Fotouh El-Gharably, Mostafa A. El-Shibini	228
14 An Expert System For Optimum Switching Pattern In Distribution Management Y. G. Moustafa, A. H. Amer, M. M. Mansour, H. K. Temraz, M. A. Madkour.....	237
15 Decision Aides For FMS Part-Selection: A Due Date-Based Approach N. S. Mohamed	254
16 Effective Technique To Solve N x M Flow Shop Sequencing Problems Reda M. S. Abd El-Aal	276
17 Effect of Ventilation Air Streams On The Location of Fire Detection Devices N. A. Mahmoud, A. M. R. El-Baz & A. A. E. Ghozlan	291
18 An experimental Investigation of Cement Coated Aluminum Wire Mesh As storing Medium in Thermal Storage System A. I. El-Sharkawy, W. H. Tadros & Z. S. Abdel-Rehim	321
19 Simulation of A Steam-Turbine Cold-End system Richard J. Messina	335
20 A Mathematical Model For Determining The Intersection of Two Algebraic Surfaces M. Afawat, M. N. Mikhail, T. El-Areef, & M. Ali Said	356
